'JNANA SANGAMA' BELAGAVI-590 014, KARNATAKA

MINI-PROJECT REPORT

ON

“NEWS PORTAL MANAGEMENT SYSTEM”

SUBMITTED IN PARTIAL FULFILLMENT OF THE REQUIREMENT
FOR THE V SEMESTER, BE, DBMS LAB WITH MINI PROJECT-18CSL58

Submitted By

SHEETHAL K S

[1CG20CS092]

RUBEENA KOUSAR

[1CG20CS081]

Under the guidance of:

Mr.DHARANESH KUMAR M L M.Tech.,
Asst. Prof., Dept. of CSE,
CIT, Gubbi, Tumakuru.

HOD:

Dr. Shantala C P, Ph.D
Vice Principal & Head,
Dept. of CSE,
CIT, Gubbi, Tumakuru.

Channabasaveshwara Institute of Technology

(ISO 9001:2015 Certified Institution)

NH 206 (B.H. Road), Gubbi, Tumakuru 572 216. Karnataka.

(Affiliated to Visvesvaraya Technological University, Belagavi & Recognized by AICTE New Delhi)

2022-23

DEPARTMENT OF COMPUTER SCIENCE ENGINEERING

CERTIFICATE

This is to certify that the mini project work entitled “**NEWS PORTAL MANAGEMENT SYSTEM**” has been successfully carried out by **SHEETHAL K S [1CG20CS092]**, **RUBEENA KOUSAR [1CG20CS081]** bonafide students of **CHANNABASAVESHWARA INSTITUTE OF TECHNOLOGY, GUBBI, TUMAKURU**, under our supervision and guidance and submitted in partial fulfillment for V Semester B.E, DBMS Lab with Mini project-18CSL58 by **Visvesvaraya Technological University, Belagavi** during the academic year of 2022–2023. It is certified that all corrections/suggestions indicated for internal assessment have been incorporated in the report deposited in the departmental library. The mini project report has been approved as it satisfies the academic requirements for the above said degree.

Guide:

Mr. DHARANESHKUMAR M L M.Tech.,
Asst. Prof., Dept. of CSE,
CIT, Gubbi, Tumakuru

H.O.D:

Dr. Shantala C P, Ph.D
Vice Principal & Head,
Dept. of CSE,
CIT, Gubbi, Tumakuru

Principal:

Dr. Suresh D S Ph.D
CIT, Gubbi, Tumakuru.

Examiners:

1.

2.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

DECLARATION

We, **SHEETHAL K S** and **RUBEENA KOUSAR** , students of V Semester, B.E, in Computer Science and Engineering, **C.I.T, Gubbi**, here by declare that the project work entitled “**NEWS PORTAL MANAGEMENT SYSTEM**”, embodies the report of our project work carried out independently by us under the guidance of **Mr. Dharanesh Kumar M L** , Assistant Professor, Department of CSE, CIT, Gubbi, as partial fulfillment of requirements for the V Semester during the academic year **2022-23**. We further declare that the project has not been submitted for the award of any other degree.

Place: GUBBI

SHEETHAL K S

Date:

USN:1CG20CS092

RUBEENA KOUSAR

USN: 1CG20CS081

ACKNOWLEDGEMENT

A great deal of time and lot of effort has gone into completing this project report and documenting it. The number of hours spent in getting through various books and other materials related to this topic chosen by me have reaffirmed its power and utility in doing this project.

Several special people have contributed significantly to this effort. First, we are grateful to our institution **Channabasaveshwara Institute of Technology**, Gubbi, which provides us an opportunity in fulfilling our most cherished desire of reaching the goal.

We acknowledge and express our sincere thanks to our beloved Principal & Director **Dr. Suresh D S** for his many valuable suggestions and continuous encouragement and support in the academic endeavours.

We wish to express our deep sense of gratitude to **Dr. Shantala C P**, Prof & Head, Dept of CSE, CIT, for all the guidance and who still remains a constant driving force and motivated through innovative ideas with tireless support and advice during the course of mini project to examine and helpful suggestions offered.

We express our heartfelt thanks to our guide **Mr. Dharanesh kumar M L**, Assistant Professor, Dept. of CSE, CIT, for his meticulous attention to details, which has contributed immeasurably to the quality of our project report.

Our sincere and hearty thanks to our beloved parents, Friends and others for their all-time support and co-operation

Project Associates:

SHEETHAL K S [1CG20CS092]

RUBEENA KOUSAR[1CG20CS081]

ABSTRACT

The purpose of News Portal is to automate the existing manual system by the help of computerized equipments and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with.

News Portal, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources. The organization can maintain computerized records without redundant entries.

CHAPTER 1

INTRODUCTION

The "News Portal Management System"^[1] has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all it proves it is user-friendly. News Portal , as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources.

Every organization, whether big or small, has challenges to overcome and managing the information of Category, News, Weather News, News Report, Bollywood News. Every News Portal has different News needs, therefore we design exclusive employee management systems that are adapted to your managerial requirements. This is designed to assist in strategic planning, and will help you ensure that your organization is equipped with the right level of information and details for your future goals. Also, for those busy executive who are always on the go, our systems come with remote access features, which will allow you to manage your workforce anytime, at all times. These systems will ultimately allow you to better manage resources.

CHAPTER 2

HISTORICAL REVIEW

2.1 History of News Portal

A lot of project work has carried on News Portal System. At the present time, News Portal websites are available. But most of this website is static and traditional. There is no feature that can make people awareness. This is why we have done this project. Our project has many features that can aware the people. By using this website one can get more and more information that helps the people in their daily life.

Now-a-days we live in age of Information Communication and Technology .We can't think a single moment without technology From morning to night, we need help of the technology. This is the revolutionary time of computer technology. Most of the works depends on web application. For this reason, anytime, anywhere, anyone can access a website by internet at low cost and we can find our expectable and most update information from website. At present information is one the most valuable resource of the current world. We have developed our project so that we can aware the people.

CHAPTER 3

REQUIREMENT SPECIFICATION

3.1 System Requirements

The basic requirements for the development of this mini project are as follows

3.1.1 Hardware Configuration

1. Processor: Intel core i3 or above
2. Ram: 8 Gb
3. Hard disk: 1 Tb

3.1.2 Software Configuration

1. Front end tool: HTML, CSS
2. Back end tool: PHP
3. Development tools: XAMPP server
4. Browser: Google or any
5. Documentation tool: Microsoft office 2003 or above

3.2 Development Environment

Frontend – HTML, CSS

It is the standard mark-up language for creating web pages and web applications. With Cascading Style Sheets (CSS) and PHP^[2], it forms a triad of cornerstone technologies for the World Wide Web. Web browsers receive HTML documents from a web server or from local storage and render the documents into multimedia web pages. HTML describes the structure of a web page semantically and originally included cues for the appearance of the document. HTML can embed programs written in a scripting language such as JavaScript, which affects the behaviour and content of web pages. Inclusion of CSS defines the look and layout of content. The World Wide Web Consortium (W3C), maintainer of both the HTML and the CSS standards, has encouraged the use of CSS over explicit presentational HTML since 1997.

Backend - MySQL

It is an open source relational database management system (RDBMS). The MySQL development project has made its source code available under the terms of GNU General Public

License, as well as under a variety of proprietary agreements. MySQL is also used in many high-profile. Large-scale websites, including Google, Facebook, Twitter, Flickr, YouTube.

PHP - PHP is a server-side scripting language designed for web development but also used as a general-purpose programming language. PHP is now installed on more than 244 million websites and 2.1 million web servers. Originally created by Rasmus Lerdorf in 1995, the reference implementation of PHP is now produced by The PHP Group. While PHP originally stood for Personal Home Page, it now stands for PHP: Hypertext Preprocessor, a recursive backronym. PHP code is interpreted by a web server with a PHP processor module, which generates the resulting web page: PHP commands can be embedded directly into an HTML source document rather than calling an external file to process data. It has also evolved to include a command-line interface capability and can be used in standalone graphical applications. PHP is free software released under the PHP License. PHP can be deployed on most web servers and also as a standalone shell on almost every operating system and platform, free of charge.

APACHE - The Apache HTTP Server is a web server software notable for playing a key role in the initial growth of the World Wide Web. In 2009 it became the first web server software to surpass the 100 million web site milestone. Apache is developed and maintained by an open community of developers under the auspices of the Apache Software Foundation. Since April 1996 Apache has been the most popular HTTP server software in use. As of November 2010 Apache served over 59.36% of all websites and over 66.56% of the first one million busiest websites.

XAMPP - XAMPP is a small and light Apache distribution containing the most common web development technologies in a single package. Its contents, small size, and portability make it the ideal tool for students developing and testing applications in PHP and MySQL. XAMPP is available as a free download in two specific packages: full and lite. While the full package download provides a wide array of development tools, XAMPP Lite contains the necessary technologies that meet the Ontario Skills Competition standards. The light version is a small package containing Apache HTTP Server, PHP, MySQL, phpMyAdmin, OpenSSL, and SQLite.

Normalization

Normalization^[3] is a process of organizing the data in database to avoid data redundancy, insertion anomaly, update anomaly & deletion anomaly. To overcome these anomalies we need to normalize the data. There are 4 basic types of normalizations. They are:

- First normal form(1NF)
- Second normal form(2NF)
- Third normal form(3NF)
- Boyce & Codd normal form (BCNF)

A table is said to be in 2NF if the two conditions stated are satisfied. The table is in First normal form and all the non-prime attribute are dependent on the proper subset of any candidate key of table. The attribute that is not part of any candidate key are known as non-prime attribute.

A table design is said to be in 3NF if the table is in 2NF and Transitive functional dependency of non-prime attribute on any super key are removed.

A table design is said to be in BCNF if there is only one super key.

CHAPTER 4

SYSTEM DESIGN

4.1 ER DIAGRAM

Fig 4.1 ER Diagram for News Portal Management system

4.2 SCHEMA DIAGRAM

Fig 4.2 Schema Diagram for News Portal Management System

The database schema of a database system is its structure described in a formal language supported by the database management system (DBMS). The term "schema" refers to the organization of data as a blueprint of how the database is constructed (divided into database tables in the case of relational databases). The formal definition of a database schema is a set of formulas (sentences) called integrity constraints imposed on a database.

CHAPTER 5

SYSTEM IMPLEMENTATION

5.1 OPERATIONS PERFORMED:

Create, create table statement is used to create table to store data. Integrity constraints like primary key, foreign key, unique key, can be defined while creating the table.

Insertion, insertion is use to insert the tuple or row to the table. We insert value from frontend by making use HTTP the value inserted from to frontend will be going to store in backend database in XAMPP Server.

Update, update will help to edit the tables in the database. In this project we have given update option for table package, to update the place column in package table.

Delete, delete will help us to delete a tuple or row from the table. In this project we have delete option for table employee to delete the particular row or employee information from the table.

Trigger, a trigger is a special kind of stored procedure that automatically executes when an event occurs in the database server. DML triggers execute when a user tries to modify data through a data manipulation language(DML) event. DML events are INSERT, UPDATE, OR DELETE statements on a table or view.

Stored procedure^[5], a stored procedure is a set of Structure Query Language(SQL) statements with an assigned name, which are stored in a relational database management system as a group, so it can be reused and shared by multiple programs.

View, views can join and simplify multiple tables into a single virtual table. Views can act as aggregated tables and can hide the complexity of the data.

Scenarios where Triggers are used in this project:

- Set the default value as **Posted** in **status** attribute in **TBL_POSTS** if the admin posts the news.
- Set the default value as **No** in **checked** attribute in **TBL_COMMENTS** if the user gives his comments on the news .

Scenarios where Stored Procedures are used in this project:

- Retrieving the details of username from TBL_ADMIN.
- Retrieving the details of news categories available from TBL_CATEGORY.
- Retrieving the details of news(s) available from TBL_COMMENTS.
- Retrieving the details of about us from TBL_PAGES.
- Retrieving the details of posts(s) from TBL_POSTS.
- Retrieving the details of subcategory(s) from TBL_SUBCATEGORY.

Scenarios where Views are used in this project:

- To display the **Active live news** in the dashboard for the admin(s).
- To display the **Active categories listed** in the dashboard for the admin(s).
- To display the **Active listed subcategories** in the news portal for the admin(s).
- To display the **Total number of views** in the newsportal for the admin(s).
- To display the **Unchecked comments(feedback) from the users**.

Shah holds meeting with NE states leaders in Manipur

Category : [Politics](#) | Sub Category : National Posted on 2018-07-01 00:41:44

New Delhi: BJP president Amit Shah today held meetings with his party leaders who are in-charge of 11 Lok Sabha seats spread across seven northeast states as part of a drive to ensure that it wins the maximum number of these constituencies in the general election next year.

Shah held separate meetings with Lok Sabha toli (group) of Arunachal Pradesh, Tripura, Meghalaya, Mizoram, Nagaland, Sikkim and Manipur in Manipur, the party's media head Anil Baluni said.

Baluni said that Shah was in West Bengal for two days before he arrived in Manipur. The BJP chief would reach Odisha tomorrow.

Admin Specification

This is the input panel of the Online News Paper. We have developed this panel so that we can dynamically control the Online News Paper. It is fully secured system. Without being admin or knowing user name and password no one can access it. It is fully protected from unauthorized access.

Admin Panel

The screenshot shows the 'Admin login' panel. It features a dark blue header with the 'NEWS PORTAL' logo and the text 'Admin login'. Below the header, there are two input fields: 'Username or email' and 'Password'. A red 'Log In' button is positioned at the bottom of the form.

CHAPTER 7

CONCLUSION

In our project work, an attempt has been made to develop a News or information based web site. We develop this project that helps the people and make them aware so that they can know any news. To establish this website we use various methodologies. To develop this project we have faced many problem but we hardly tried to develop this project. Our supervisor helps us by giving his valuable opinion, decision and time .

7.1 Future work:

The future scope of our project is valuable. Our project time duration was only one years .In this time interval we developed our project. It was very difficult to complete project within this time duration. In future if we get chance we will develop this website for large volume. **As for other future developments, the following can be done:**

- We will manage news reporting system.
- We can make video conferencing system
- We update our database.
- Sensibility level could add be added
